企业简介
COMPANY
INTRODUCTION

江苏恒峰精细化学股份有限公司坐落于江苏省南通市如东县经济开发区，成立于2009年12月，注册资本6500万元，占地120亩，厂房面积40000平方米，自有60000吨/年产能的煤质粉炭生产线，10000吨/年共轭内酰胺特有的生产能力，固定资产原值为15000万元。江苏恒峰是中国非卤代烃分子筛生产商，是半刚性高分子筛生产基地。公司在江苏省南通市如东县经济开发区，南通经济技术开发区和连云港市赣榆县经济开发区，拥有三个生产基地。公司拥有自主知识产权，产品通过了ISO 9001:2008、ISO 14000:2004认证，并被江苏省列入第一批高新技术企业公示名单。《中国发展》(2010) 190页。公司向国家专利局申请了多项发明专利和实用新型专利。

公司拥有优秀的管理团队，科技研发先行，在场所以开发。

公司拥有先进的技术服务团队和技术力量，能为客户打造个性化的产品解决方案。全方位的优质服务，公司以自主研发和个性化产品定制为经营理念，服务于全球，通过污水处理和固废处理。

Jiangsu Hengfeng Fine Chemical Co., Ltd. is located in Ruyong Chemical Industry Park, covering an area of 120 acres with a registered capital of 65 million yuan. The main products are the polyacrylamide powder series and polyoxymethylene resin series. The production capacity of polyacrylamide powder is 60,000 tons/year and the production capacity of polyoxymethylene resin is 10,000 tons/year. Hengfeng Chemical has been committed to the field of water treatment and petrochemical, constantly improving the technical service level and optimizing product performance, combined with the on-site sewage water quality, treatment process, dehydration equipment, and other characteristics for customers to choose suitable products and use schemes, to help customers improve the efficiency of sewage treatment. Off-site application has improved polymer molecular properties, effective coal control, adhering to the spirit of unity and innovation, adhering to the business philosophy of mutual benefit, abiding by the contract, and strive to provide customers with more cost-effective products and services. Hengfeng Chemical has become a professional research and development base of water treatment chemicals and other chemicals in China. The products are not only widely used in the domestic market but also exported to Europe, America, Africa, Oceania, Southeast Asia, and other 20 countries and regions.

MESSAGE
FROM
THE
PRESIDENT
总经理致辞

为了我们的家园，为了地球的碧水蓝天，保护环境是人类永恒不变的主题，环保产业大有可为。江苏恒峰精细化学股份有限公司作为污水处理药剂的专业生产厂家，始终秉承科技创新先行，市场开拓并重的经营理念。一直以来我们以创新的技术、优秀的质量、诚实守信的态度、团结拼搏的团队、服务共赢的合作得到了客户的认可。

为了避免同质化的竞争，我们公司不盲目追求规模，而是着力于产品使用性能的丰富和提高。我们在做好产品的同时，更专注于培养一支有技术服务能力的销售队伍；我们在售卖产品的同时更倾向于一对一的技术支持和售前售后的服务，把客户的需求作为我们的追求。

我真诚的希望我们公司在环保产业的洪流中，能得到市场的认可和客户的支持。为此我们将不懈努力，携手大家共创辉煌。

MINERAL DRESSING CHEMICALS 矿产化学品

有色金属冶炼洗砂洗煤选矿专用絮凝剂系列

FLOCCULANT SERIES SPECIAL FOR NON-FERROUS METALLURGY SAND WASHING AND COAL DRESSING

特性：易溶于水，几乎不溶于有机溶剂，含多种活性成分，适应性强，絮凝快，沉降快，适用于各种矿浆的絮凝分离。

Soluble in water, hardly soluble in organic solvent, containing many active ingredients, applicable to various types of slurry at different temperatures and high temperature and acid, which has a good solid-liquid separation effect.

氧化铝专用絮凝剂干粉系列 Settling flocculant for the red mud of alumina (powder series)

外观 Appearance	固含量 Solid Content (%)	分子量(万) Molecular Weight (Million)	电导率 Degree of Hydrolysis	溶解时间 Dissolving Time (min)
白色粉末 White Powder	>88	10-17	高-极高 High-Very High	<60

氧化铝专用絮凝剂乳液系列 Settling flocculant for the red mud of alumina (emulsion series)

外观 Appearance	固含量 Solid Content (%)	粘度(厘泊) Viscosity (cP)	电导率 (μS) Degree of Hydrolysis	溶解时间 Dissolving Time (min)	pH 值 pH Value
白色乳液 White Emulsion	>35	12-17	4.2-4.2	10-15	4-7

选矿絮凝剂 / Flocculant for Mineral Separation

外观 Appearance	固含量 Solid Content (%)	分子量(万) Molecular Weight (Million)	电导率 Degree of Hydrolysis	溶解时间 Dissolving Time (min)
白色粉末 White Powder	>88	0-19	低-中-高 Low-Medium-High	600

MINERAL DRESSING CHEMICALS

洗砂专用絮凝剂 / Flocculant for Sand Washing

外观 Appearance	固含量 Solid Content (%)	分子量(万) Molecular Weight (Million)	电导率 Degree of Hydrolysis	溶解时间 Dissolving Time (min)
白色粉末 White Powder	>88	>5	低-高 Low-High	<60

包装 PACKING

■ 干粉: Powder:
 25kg牛皮纸袋 25kg Paper bag (lined with plastic bag)
 25kg纸袋 (内衬塑料袋) 25kg Paper bag (lined with plastic bag)
 25kg吨袋 25kg PE bag

■ 乳液: Emulsion:
 25kg塑料桶装 Loaded with 25kg plastic barrel
 105kg塑料桶装 Loaded with 105kg plastic barrel and 105kg IBC tank

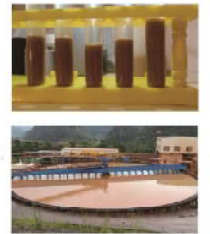

★ 贮存: Storage:
 阴凉、干燥、通风处贮存，避免阳光直射和雨淋。
 Avoid rain, moisture and sunshine during transport and storage.

应用领域 FIELD OF USE

■ 适用于氧化铝行业: 氧化铝行业生产氧化铝过程中产生的赤泥，经洗砂、磁选、电选、浮选等工序后，可经不同物料处理和不同的洗砂技术，加入适当的絮凝剂，使赤泥中的微细颗粒快速沉降，提高洗砂效率。絮凝剂在洗砂过程中，能使微细颗粒快速沉降，提高洗砂效率。

■ 适用于选矿行业: 选矿行业生产过程中产生的尾矿，经洗砂、磁选、电选、浮选等工序后，可经不同物料处理和不同的洗砂技术，加入适当的絮凝剂，使尾矿中的微细颗粒快速沉降，提高洗砂效率。絮凝剂在洗砂过程中，能使微细颗粒快速沉降，提高洗砂效率。

■ 适用于污水处理: 污水处理过程中产生的污泥，经洗砂、磁选、电选、浮选等工序后，可经不同物料处理和不同的洗砂技术，加入适当的絮凝剂，使污泥中的微细颗粒快速沉降，提高洗砂效率。絮凝剂在洗砂过程中，能使微细颗粒快速沉降，提高洗砂效率。

聚丙烯酰胺使用和保存注意事项

NOTES FOR USE AND STORAGE OF POLYACRYLAMIDE

- 本品无毒，遇水易溶，吸湿性强。
The product is non-toxic, water soluble and easy to be affected with damp and form masses.
- 沾到手上或衣服上，用水冲洗。
Water is used to clean hands when hands or skin is contaminated.
- 本品应在室温(5~30℃)，建议在干燥处存放。
The storage temperature is 5-30°C. Dry place is recommended for storage.
- 本品包装物于产品出厂一年之内使用，过期勿用。
The shelf life of dry powder product is two years. The product is recommended to be used within one year after production.
- 一般乳液的存放时间为6个月，存放时间越长，乳液上总会有一层膜析出，这属于正常现象。长时间存放的乳液，不会影响其使用效果。如果存放时间过长，乳液上层会出现沉淀物，这属于正常现象。使用前请搅拌均匀，以免影响使用效果。
The storage time of general emulsion is six months. If stored for a longer time, some layer of oil will be precipitated from the emulsion suspension, which is normal phenomenon. Stir uniformly before use so that the use effect will not be affected.
- 配好的溶液不宜久存，最好随用随配。超过24小时产品在罐体下部可能会出现效果下降。
The dilute solution prepared should not be kept for a long time, and it is best to dissolve upon use. The product viscosity will reduce after more than 24 hours, causing a decreased effect.

HEAVY DUTY OFFICE 公司生产基地
COMPANY PRODUCTION BASE

位于上海松江（总部园区）厂房有中央空调、新风系统、除尘。
Set-4-61 (5000 square meters workshop (40% green area) Central air-conditioning plant, workshop clean and tidy.
位于上海松江（总部园区）厂房有中央空调、新风系统、除尘。
Shanghai office located in Shanghai QSO (Pudong new area), covering 1000 square meters.
生产采用连续化生产，干燥、混胶设备、六室滚筒干燥、成膜和干燥干燥连续化操作。
Production workshop using four production lines, two for dry powder and two for emulsion, six room roller dryer continuous operation, hydrolysis machines and turbo-dryer continuous operation.
Using continuous automatic production, four-shift work system with three groups of workers.
主要生产设备：
Main production facilities including control room, power distribution room, laboratories and office.
辅助生产设施包括控制室、配电室、化验室及办公室。
Auxiliary production facilities including control room, power distribution room, laboratories and office.

COMPANY HONORS

我们的服务 OUR SERVICES

Service

享与服务·悦自挑战

我们承诺 WE PROMISE THE FOLLOWING SERVICES

- 售前服务 Pre-sales Services**

 - 服务热线 (0513-85105900), 接受各种综合业务咨询
Service Line: 0513-85105900, providing consultation of all integrated services
 - 提供小试、中试、大试的技术服务, 派遣技术人员到现场为客户提供全面解决方案
Provide small-scale, mid-scale and big-scale technical services, technicians could be on site to provide a comprehensive solution
 - 提供样品检测分析服务, 并出具检测报告
Provide sample analysis services, and issue a test report
- 售中服务 After-sales Services**

 - 为客户提供现场安装、调试及售后维修服务
Assist customer with on-site installation and commissioning, follow up the performance of DMM
 - 对现场处理工艺以及设备故障提供专业建议和方案
Provide reasonable suggestions on the results processing technology and equipment modification for the performance of DMM
 - 在产品使用过程中出现问题, 快速响应用户需求, 提供完善的解决方案
If a problem occurs in the product use, assist customer analysis, provide complete solution
 - 对客户提出的特殊需求, 尽最大努力满足
Other requirements of customers try best to meet the needs
